Coursera

### SUMMARY

Front-end engineer with 10+ years of experience in web technologies, specializing in architecting and delivering products from the ground up. Known for a strong growth mindset and an enduring passion for learning.

### WORK HISTORY

#### Mimecast | Senior Software Engineer

July 2024 - Present

- Architected, designed, and led the overall approach for internationalization and localization strategy for the Nx monorepo, seamlessly integrating these capabilities across the core repository.
- Architected and successfully delivered multiple migration projects that significantly enhanced the customer usability experience and drove measurable sales growth.
- Usage of Cursor to boost development productivity by 40%.

#### Altimetrik | Intuit | Frontend Engineer

May 2023 - July 2024

- Ownership of typescript SDK which was the crucial to migrate products from V1 to V2 APIs.
- Setting up the standards for GraphQL typescript support and dynamic schemaTypes generation that eased dev efforts.
- Standardizing typescript documentation and API docs.
- Ownership of Playwright setup and automation and integrating to existing pipeline.
- Maintained the codebase UT coverage of 92%

#### EclecticIQ | Senior Frontend Engineer

May 2022 - May 2023

- Led the initiative to standardize AG-GRID usage with http-streaming API integration that reduced 50% of development iterations for the next integration.
- Delivered a critical feature for the Alpha release in the first few months of joining.
- Building an XDR product from scratch.

## SENIOR FRONT-END ENGINEER

### AWARDS RECEIVED

- Client appreciation at Intuit for notable contributions across multiple projects
- 2 Commit awards at JiffleNow in the year 2018 and 2019 for my contributions towards the new features and deliveries
- Syncron Spot Award 2020, for contributions towards the team's release

### Syncron | Senior Software Engineer | Frontend

Oct 2019 - May 2022

- Frontend lead for a team of three UI members.
- Pioneered the migration of JSF UI to Angular 12, enhancing product appeal and functionality.
- Conceived and spearheaded the transition from NGX-charts to Highcharts to significantly enhance our data visualization capabilities.
- Ownership of project planning, setting up the groundwork, tool selection, lazy loading, route planning, and error handling strategies.
- Served as the SPOC for conducting technical feasibility assessments of Highcharts implementations across the company, ensuring optimal integration.

### JiffleNow | Senior Software engineer | Frontend

Jun 2017 – Oct 2019

- Working with the core UI team, responsible for migrating features from the old tech stack to ReactJs, enhancing overall product experience, and improved overall NPS.
- Building Salesforce FE integration to make the product available on the Salesforce App Market.
- Tech-debt improvements and performance improvements that helped the sales team close the deal with AWS and improve the overall application experience and load time of a page by 2 seconds.

### Oracle | Associate Software Engineer

Oct 2015 – Jun 2017

- Built the product from scratch using JQuery, knockoutJS, requireJs, and Oracle internal toolkit framework(OJET)
- Built an internal poker tool with HTML, CSS, vanillaJS & firebase APIs, as an assignment project.

### EDUCATIONAL HISTORY

#### PESIT | 74.72% (VTU)

Bachelor's in Computer Science Engineering | Sept 2011 - Jul 2015
